

Innovation and Regulation in an Era of Transition

Douglas Cooke

Head of Division for Europe, Middle East and Africa

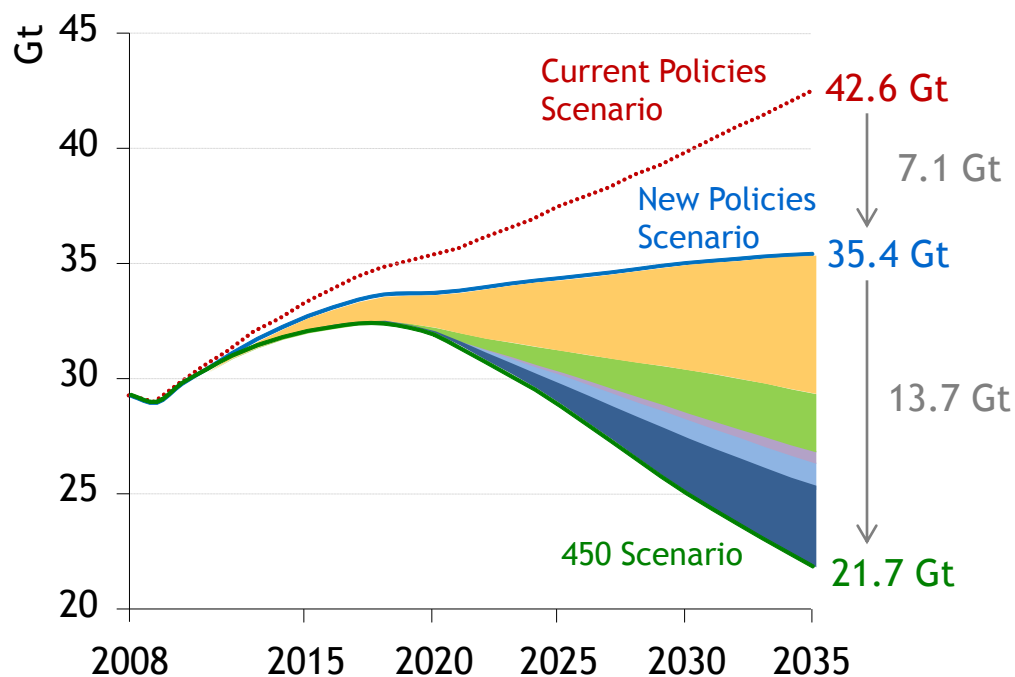

Office of Global Energy Dialogue

International Energy Agency

Moscow, 25 November 2010

The context: A low carbon future

World energy-related CO₂ emission savings by technology in the 450 Scenario relative to the New Policies Scenario

Share of cumulative abatement between 2010-2035

Efficiency	50%
Renewables	18%
Biofuels	4%
Nuclear	9%
CCS	20%
